

## Lima Monitor Arms

Display your screens with ease. Lima is an intuitive, ergonomic monitor arm that's easy to install and even easier to use. Make an adjustment with the press of a button, putting your monitor at an ideal height, distance, and tilt. You can add another screen as your office's needs grow, no tools required. With Lima, people can seamlessly adjust their computer screens by height, distance, and angle for healthy interaction with technology. Add this monitor arm to any desk to give people more flexible and healthy work experiences.

### Benefits

- Add another monitor easily with an extension arm—no need for tools
- Move the screen up or down to the ideal height with the press of a button
- Tilt the screen up to 80 degrees back or 10 degrees forward

### Warranty

12-year
