

MOTIV3

Crestline[®]

Motiv3 Worksystem - All Pro. No Cons.

The Motiv 3 workstation system is designed in New Zealand by Crestline to be a simple, high quality, sustainably manufactured modular workstation system with the world's most effective cable management.

The most advanced workstation system on the market in New Zealand, Motiv 3 is designed to eliminate distractions and promote productivity, letting you focus on what really matters.

Quality

Motiv 3 has been through a **rigorous independent quality testing** process, run by Furntech/AFRDI to AS/NZS4442:2018 standard, including tests such as 400 consecutive up/down cycles, 200 kg of distributed static load testing, horizontal stability impact testing with 45kg on the desktop, and many more.

The outstanding results from Motiv3 quality testing mean we offer a **10-year warranty** on all components.

Motiv 3 uses high quality European mechatronics made in Denmark by Linak - the world's largest, oldest and most highly respected manufacturer of linear actuators.

Continuity and Compability

Motiv 3 is a Crestline in-house design with **guaranteed availability of compatible components** throughout the warranty period and beyond. Any damaged component can be quickly replaced from our extensive stock, extending the useful life of the system.

Flexibility

The Motiv3 workstation system is highly flexible, modular and user friendly.

The frame system is a kit of adjustable and interchangeable parts, enabling size changes and retrofitted upgrades at minimal expense and zero waste.

- Fixed height desks can be converted to sit-stand simply by swapping the legs only, and reusing the tops, beams, brackets, feet, and cabling.

- Double pods can be split into single desks with the addition of feet.
- Single desks can be combined into double pods by removing the feet and adding connecting rails.
- Heavy duty telescopic top beams allow the same beams to be used on all sizes of desks.

Sustainability

Motiv 3 has been independently tested and achieved AFRDI Green Tick Level B/Gold – GBCA Level A recognition. This is the highest level of sustainability certification available, contributing maximum points towards NZGBC Green Star interiors.

Clearway - Cable Chaos Conquered.

Spend more time on what matters and less time on IT frustrations with the Clearway power system.

Managing cabling using traditional solutions has always been a challenge, leading to unsightly clutter, user frustrations, inefficiencies, and health and safety issues. To solve this, we designed Clearway, a desk top integrated solution

that keeps **cabling tidy and out of sight**. Clearway houses power and data sockets in a high-capacity cable duct along the rear edge of the desktop, providing **easy access to power** and tidy hidden cabling.

- A clean aesthetic created by the elimination of the centrally fixed frame-mounted tray.
- Eliminate desk clutter by

accommodating excess cabling and peripherals in the Clearway.

- Clearway eliminates the need to crawl under the desk to access power points
- Clearway includes Powerchute, a flexible cable sock that keeps its shape due to a rigid spine.
- Configuration options include 4 or 6 power points, dual USB, and provision for 3 data.

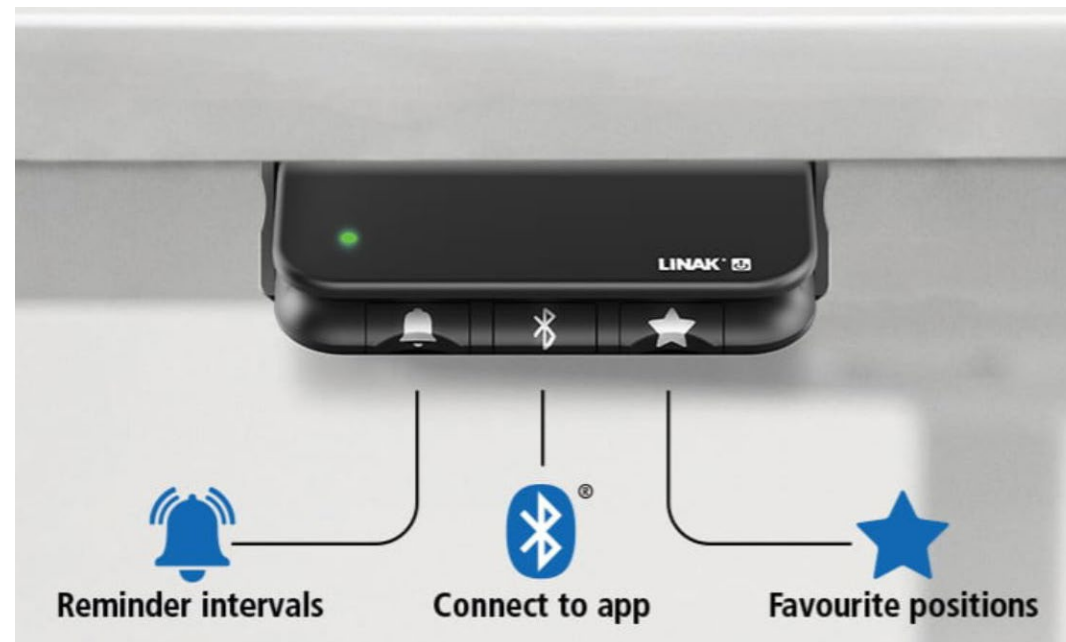

Note the tidiness of the rigid cable sock and elimination of frame-mounted under-desk tray.

Touch Controller

Your desk is equipped with an intuitive desk panel designed for easy handling, and to help you stay active throughout your working day.

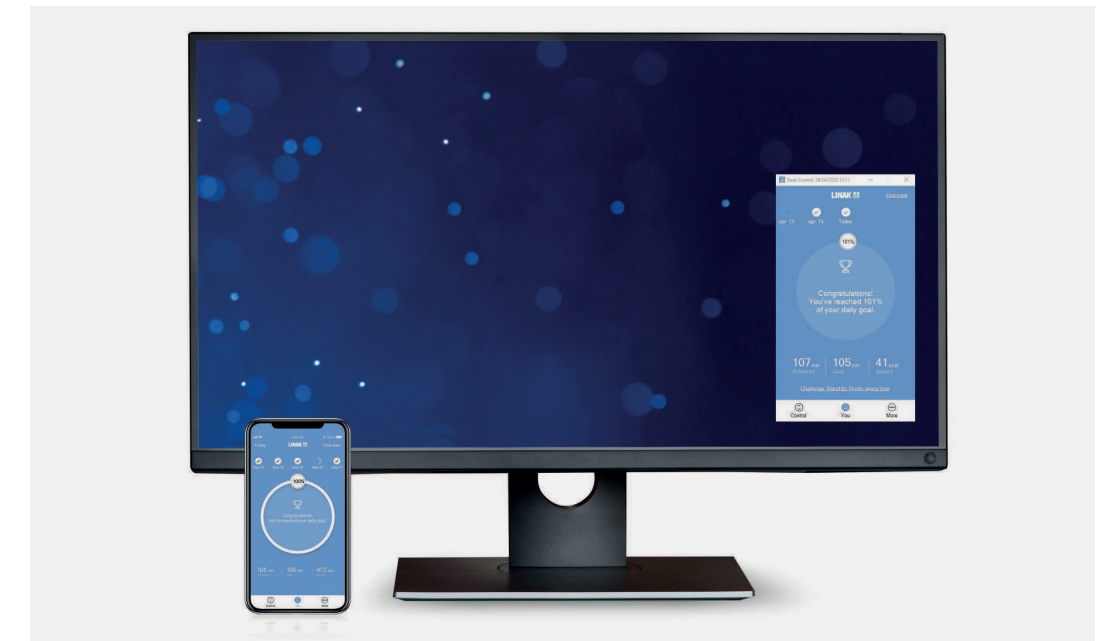

- Up and down drive
- Save your own favourite sit-stand positions. Your panel can store two different desk heights, ensuring optimal ergonomics.
- Get notifications of when to stand up - an LED that shows you when it is time to stand

Desk Control™ App

By downloading the LINAK® Desk Control™ App, desk users come one step closer to changing their prolonged and often unhealthy sitting behaviour. The app is developed for users of electric sit-stand desks, equipped with e LINAK® DPG Desk Panels DPG1M.

- Supports iOS or Android mobile devices, or PC (Windows 10)
- Works via Bluetooth® Low energy technology
- Adjust desk height, and display actual height on your phone screen
- Displays error codes and links LINAK website support
- Save up to two favourite positions in the app, thus improving ergonomics by using the optimal work heights – whether sitting or standing.
- Friendly reminders help the user to change position frequently
- Statistics of your daily achievements (standing time and burned calories)
- Available in English, German, French, Spanish, Italian, Korean, Chinese, and Japanese.

Specifications

Configurations:

Rectangle or round legs
Straight, 90°, 120° 3-pod (Available in fixed height and height adjustable)

Dimensions (mm):

Height (fixed height desks): 740H

Standard Sizes:

Straight desks: 1200-2000L x 800D

90: 1500-1800L both ways, x 750D

120° 3-pod: 1200x1200L, 1300x1300 both ways

Electric Adjust Height Range: 600-1240mm

Finishes:

Frame: White or Black powdercoat
Tops: Melamine, Veneer, Solid Timber

Quality:

AS/NZS 4442:2018

ISO 9001

10 Year Warranty

Lead Time:

4-6 weeks

Large Project Quantity: 10-12 weeks

Workspaces so good you'll look forward to Monday mornings.

The relationships people have with the office is fundamentally changing. How, where and when people work is no longer uniform. Nor are our solutions. We believe in the power of creating engaging spaces and furniture, so inspired and productive teams look forward to coming to work on Monday mornings.

For over 30 years Crestline has been helping design office spaces for companies who want more. More options, more flexibility, more design. Over the next 30 years we want to see NZ furniture design celebrated on the world stage, ethically, sustainably and joyfully.

Crestline; look forward to Monday mornings.
